The Chameleon Plus will generate four-color 320 x 200 graphics on an external color display. And or course, Chameleon Plus graphics are compatible with the IBM-PC®.

The Disk Drives:

Standard are dual 5 1/4" disk drives storing 320K. The unique design of the Chameleon Plus allows you to use the software and diskettes available for the IBM-PC® with no modification whatsoever.

Extensive Software:

Included with your Chameleon Plus is an extensive business-oriented software package, including MS-DOS®, M Basic®, Perfect Writer®, Perfect Speller®, Perfect Calc®, C-Term®, G W Basic® and the valuable Condor I® database management system. Each has been selected both for ease of operation and versatility. And each is standard with the Chameleon Plus.
